

List of Recommended Devices for Skynamo Use

Please note these recommended devices are not applicable for all countries, please ensure the device you select has a GPS functionality, a sim card slot and that it is compatible in your country of residence.

Recommended Devices For Optimal Use

The following devices are high-end devices which we recommend for the best possible Skynamo experience:

Android

- Galaxy Tab S3 9.7 (Tablet)
- Samsung Galaxy S9 (Mobile Phone)

iOS

- Apple iPad Pro 9.7 (Tablet)
- iPhone XS (Mobile Phone)

Skynamo Tested Devices

The following devices are what we use to do our testing on. These are not the best recommended devices, but Skynamo functions on them and they work for companies with smaller databases and less intensive Skynamo use.

Android

- Lenovo Tab 4 8 (Tablet)
- Huawei MediaPad M3 Lite 8 (Tablet)
- Lenovo A7-50 A3500
(Tablet - No Teamviewer
Quicksupport Available)
- Xiaomi Mi Max
(Tablet - No Teamviewer
Quicksupport Available)

iOS

- Apple iPad Pro 9.7 (Tablet)
- iPhone 7 (Mobile Phone)

Minimum Specs

These are the minimum specs for Android and IOS devices. Please note, ***we do not encourage purchasing low-end devices***, and even though a device may meet the minimum specs, there may still be other unforeseen software issues interfering with the use of Skynamo.

Although Skynamo may function on lower end devices, the user experience may not be as good as it could be with higher end devices. Lower end devices also become obsolete far quicker than higher end devices, and more often than not present unexpected issues.

If you are considering purchasing a non - recommended / tested device, we suggest you first bring the device into the Skynamo Headquarters for testing and confirmation of Skynamo functionality.

Android

- Android 6 OS
- 2 GB RAM
- 16GB Storage space
- Quad-Core
- GPS
- Sim Card Slot

iOS

iPad

- iPad 5
- iOS Version 10

iPhone:

- iPhone 6
- iOS Version 10

Device Supplier

Skynamo does not procure devices for clients, and all device purchases are the responsibility of the client. Skynamo makes use of Shopmax for the supply of devices. Please feel free to visit their [site](https://www.shopmax.co.za/?p=skynamo) to view and order compatible devices for Skynamo Use:
