

# SKYNAMO LINK: Minimum Requirements

This document outlines the minimum requirements for Skynamo's on-premises integration tool, Skynamo Link. To support the options for automation and integration to on-premise Accounting and ERP systems, an on-premise installation is required. This comprehensive guide breaks down the specific server components, such as processor, memory, storage, and networking requirements needed for seamless functionality.

We have provided 2 sets of specifications below. One that serves as a bare minimum, and another which is the much-preferred option to support the robust performance and reliability of our integration tool.

## Minimum

FREE DISK SPACE

**250GB**

FREE MEMORY

**4GB**

on a machine currently in use

**16GB**

on a new machine

OPERATING SYSTEM

**Windows 10**

or
